Navalny, Thorn in Putin’s Side, Dies in Arctic Prison

By VALERIE HOPKINS and ANDREW E. KRAMER

Aleksei A. Navalny, an anticorruption activist who for more than a decade led the political opposition in President Vladimir V. Putin’s Russia, died on Friday in a prison inside the Arctic Circle, according to the Russian authorities.

His death was announced by Russia’s Federal Penitentiary Service, which said that Mr. Navalny, 47, lost consciousness on Friday after taking a walk in the prison where he was moved late last year. He was last seen on Thursday, when he had appeared

in a court hearing via video link, smiling behind the bars of a cell and making jokes.

Mr. Navalny’s lawyers and relatives are expected to arrive on Saturday at the Arctic prison where he had been held, said Kira Yarmysh, his press secretary. Despite their initial skepticism, Mr. Navalny’s advisers said later that they believed he had died because of unusual happenings in Kharp, where he had been held. Ivan Zhdanov, the director of Mr. Navalny’s anticorruption foundation, said the prison stopped taking calls and had been put under special protection.

Mr. Navalny had been serving multiple sentences that would

Opposition Leader Had Endured Poisoning and Isolation

probably have kept him in prison until at least 2031 on charges that his supporters say were largely fabricated in an effort to muzzle him. Despite increasingly harsh conditions, including repeated stints in solitary confinement, he maintained a presence on social media, while members of his team continued to publish investigations into Russia’s corrupt elite from exile.

Mr. Navalny was given a three-and-a-half-year prison sentence in February 2021 after returning to Russia from Germany, where he had been recovering from being poisoned with a nerve agent the previous August. In March 2022, he received a nine-year sentence for embezzlement and fraud in a trial that international observers denounced as “politically motivated” and a “sham.” And in August 2023, he was sentenced to 19 years in prison for “extremism.”

Mr. Navalny had essentially returned from the dead after his 2020 poisoning and had conducted multiple hunger strikes to improve his treatment, with many

Russia Loses A Potent Voice Against a War

By ANTON TROIANOVSKI

The death of Russia’s most prominent opposition leader, Aleksei A. Navalny, at a remote Arctic prison on Friday ended one of the most audacious political careers of modern times and left wartime Russia without its most charismatic antiwar voice.

Mr. Navalny, whose death was reported by the Russian authorities, stood as the most outspoken critic of President Vladimir V. Putin for more than a decade, harnessing broad opposition to the Russian leader more successfully than any other foe of the Kremlin. After surviving a poisoning widely seen as the Kremlin’s doing in 2020 and recovering in Germany, Mr. Navalny returned to Russia in 2021 and was immediately arrested.

But Mr. Navalny, a joking, gregarious, straight-talking former real estate lawyer, stayed relevant even from prison, publishing Instagram posts via messages relayed by his lawyers that were at once humorous and outraged. He pleaded with Russians not to give up or give in to their fears, and railed against the “criminal” war in Ukraine, which he said would bring the “continued impoverishment of Russian people.”

The reports of his death stunned his supporters and politicians around the world. Mikhail Vinogradov, a Moscow

A nonprofit spent \$8.9 million to turn a golf course in San Geronimo, Calif., into a public park.

Well-Tended Fairways Give Way to Wild Places

By CARA BUCKLEY

There was scraggly grass in one sand trap and wooden blocks and a toy castle in another, evidence of children at play. People were walking their dogs on the fairway, which was looking rather ragged and unkempt. This was only to be expected.

Nowadays, these grounds are mowed just twice a year, and haven’t been doused with pesticides or rodenticides since 2018, which

A Comeback for Nature as Courses Close

was when this 157-acre stretch of land stopped being the San Geronimo Golf Course, and began a journey toward becoming wild, or at least wilder, once again.

A small number of shuttered golf courses around the country have been bought by land trusts,

municipalities and nonprofit groups and transformed into nature preserves, parks and wetlands. Among them are sites in Detroit, Pennsylvania, Colorado, the Finger Lakes of upstate New York, and at least four in California.

“We quickly recognized the high restoration value, the conservation value, and the public access recreational value,” said Guillermo Rodriguez, California state

Trump Is Said To Favor Limit For Abortions

This article is by Maggie Haberman, Jonathan Swan and Lisa Lerer.

Former President Donald J. Trump has told advisers and allies that he likes the idea of a 16-week national abortion ban with three exceptions, in cases of rape or incest, or to save the life of the mother, according to two people with direct knowledge of Mr. Trump’s deliberations.

Mr. Trump has avoided taking a clear position on restrictions to abortion since Roe v. Wade was overturned in the middle of 2022, galvanizing Democrats ahead of the midterm elections that year. He has said in private that he wants to wait until the Republican presidential primary contest is over to publicly discuss his views, because he doesn’t want to risk alienating social conservatives before he has secured the nomination, the two people said.

Mr. Trump has approached abortion transactionally since becoming a candidate in 2015, and his current private discussions reflect that approach.

One thing Mr. Trump likes about a 16-week federal ban on abortions is that it’s a round number. “Know what I like about 16?” Mr. Trump told one of these people, who was given anonymity to describe a private conversation. “It’s even. It’s four months.”

When discussing prospective vice-presidential candidates, Mr. Trump often asks whether they are “OK on abortion.” He is in-

Biden Sees Rift In Town Stung By Derailment

By ZOLAN KANNO-YOUNGS and ERICA L. GREEN

EAST PALESTINE, Ohio — President Biden traveled to East Palestine on Friday to show solidarity with a community still reeling more than a year after a Norfolk Southern train derailed, spilling a toxic mess across this small Ohio town near the border with Pennsylvania.

But what he found when he got here were divisions on every corner.

On the main street, protesters accused the White House of neglect and asked why it had taken Mr. Biden so long to visit. More than 100 Trump supporters, some of whom had driven in from out of state, held up “Impeach Biden” signs.

And still others said they were sick of their town being used as a political prop and wanted answers about their long-term health.

Mr. Biden alluded to some of those differences during remarks near the crash site, saying that “it doesn’t matter if you’re a Democrat or Republican or independent.”

“What matters is we’re all Americans,” Mr. Biden continued. “We look out for one another. We leave no one behind. And we come back stronger than before.”

Mr. Biden also said the National Institutes of Health would issue six grants to research universities to study “the short- and long-term impacts” of the toxic spill — a key concern among residents, many
