Senior Assistant Editor

The Umm Suqeim Street Improvement Project, a key infrastructure initiative aimed at easing congestion, reducing travel times, and improving connectivity across the emirate, is now 70 per cent complete. The development extends from the intersection of Al Khail Road to Shaikh Mohammad Bin Zayed Road and forms a central component of the broader Umm Suqeim-Al Qudra corridor, which spans 16km from Jumeirah Street to Emirates Road. A central feature of the project is the construction of an 800-metre tunnel near Kings' School in Al Barsha South.

16,000 vehicles per hour

The tunnel will include four lanes in each direction. Once completed, the upgrade will increase Umm Suqeim Street's capacity to 16,000 vehicles per hour in both directions.

The improvements are also expected to drastically cut travel time between Shaikh Mohammad Bin Zayed Road and Al Khail Road from 9.7 minutes to just 3.8 minutes, a 61 per cent reduction.

UAE residents can now invest in property with just Dh2,000

REGION'S FIRST TOKENISED REAL ESTATE INVESTMENT PLATFORM LAUNCHED

DUBAI
BY JUSTIN VARGHESE
Your Money Editor

The Dubai Land Department (DLD) has launched the region's first tokenised real estate investment platform, 'Prypco Mint', allowing UAE residents to invest in property from just Dh2,000.

The pilot project, available only to UAE ID holders for now, is a collaboration with Prypco and Ctrl Alt, and is backed by the Virtual Assets Regulatory Authority (VARA), the Central Bank of the UAE, and the Dubai Future Foundation.

Zand Digital Bank is the banking partner for the initiative.

Through mint.prypco.com, investors can buy fractional shares in ready-to-own Dubai properties using UAE dirhams. Cryptocurrency is not accepted during the pilot phase.

Investor safeguards in place

Investor funds are deposited in a regulated Client Money Account (CMA) structure and are only released after the purchase process is completed. Oversight is provided by DLD, VARA, and the Central Bank.

All listed properties undergo regulatory review to ensure fair

pricing. The pilot currently includes two licensed companies, Prypco and Ctrl Alt, with more expected to join in future phases.

Returns for investors may come from both rental income and property appreciation. Ownership shares are legally registered with the DLD.

First announced in March, the

initiative is part of Dubai's wider push to democratise property ownership.

Tokenisation allows multiple investors to co-own a property via blockchain-based digital tokens, with each token representing a share in the asset.

This opens up access to smaller and first-time investors.

Unlike crowdfunding, tokenisation offers a more regulated and transparent framework. DLD estimates tokenised real estate could make up 7 per cent of Dubai's property market by 2033 — worth around Dh60 billion.

A global rollout and platform expansion are planned in later stages.
