UAE Presidential Court

MOHAMMAD RECEIVED BY ERDOGAN IN TURKEY

President His Highness Shaikh Mohammad Bin Zayed Al Nahyan is received by Turkey's President Recep Tayyip Erdogan upon arrival at the Presidential Palace in Ankara, yesterday. Earlier, Shaikh Mohammad was received by Alparslan Bayraktar, Minister of Energy and Natural Resources of Turkey, upon arriving at Esenboga International Airport in Ankara during his state visit to Turkey.

Dubai launches world's 1st system for human-machine collaboration

System designed to enhance transparency in research and content production

DUBAI
BY NATHANIEL LACSINA
Senior Web Editor

Shaikh Hamdan Bin Mohammed Bin Rashid Al Maktoum, Crown Prince of Dubai, Deputy Prime Minister and Minister of Defence of the UAE, and Chairman of the Board of Trustees of the Dubai Future Foundation, approved the launch of a global classification system that enables in differentiating between the role of humans and machines in the research, production, and publication of creative, scientific, academic, and intellectual content.

Shaikh Hamdan said: "Distinguishing between human creativity and artificial intelligence has become a real chal-

5 PRIMARY ICONS

- All Human:** Content is fully produced by a human with no machine involvement.
- Human led:** Human-produced content enhanced or checked by machine for accuracy, correction, or improvement.
- Machine assisted:** Humans and machines worked together iteratively to produce content.
- Machine led:** Machine took the lead in producing the content, with humans verifying quality and accuracy.
- All Machine:** Content was entirely generated by machine with no human input.

lenge in light of today's rapid technological advances. This calls for a new approach to recognise the growing role of intelligent machines.

"We invite researchers, writers, publishers, designers, and content creators around the world to adopt this new global classification system and use it responsibly and in ways that benefit people."

Adoption

Shaikh Hamdan directed all Dubai Government entities to start adopting the system in their research and knowledge-based endeavours.

The Human-Machine Collaboration (HMC) classification system, developed by the Dubai Future Foundation, is designed to enhance transparency in research and content production. It offers a visual representation that enables readers, researchers, and decision-makers to understand how much of a given output was shaped by intelligent machines, across fields such as research, design, and publishing. Such fields are increasingly becoming reliant on machines and automation technologies.

UAE loading eighth aid ship to Gaza

SHIPMENT COMPRISES FOOD ITEMS, MEDICINES, DRINKING WATER TANKERS

ABU DHABI

The loading of the eighth UAE aid ship, Khalifa, began yesterday at Khalifa Port in Abu Dhabi. Once loading is complete, the vessel will sail to Al Arish Port in Egypt in preparation for delivering humanitarian aid to the Gaza Strip.

This initiative forms part of the UAE's ongoing commitment to supporting the people of Gaza.

The ship carries a substantial cargo of humanitarian and relief aid aimed at alleviating the suffering of civilians and providing vital supplies under the challenging conditions in the Strip.

The shipment includes a variety of food items, such as ready-to-eat food parcels and provisions to operate community kitchens and field bakeries. It also comprises shelter materials, including tents, relief kits, clothing, mattresses and hygiene kits for families and children.

Field hospital on ship

Furthermore, the ship carries a fully equipped field hospital covering multiple medical specialities, along with ambulances, essential medicines, medical supplies and drinking water tankers to ensure clean

The shipment includes a variety of food items, such as ready-to-eat food parcels and provisions to operate community kitchens and field bakeries.

water access for affected communities.

This shipment is part of a series of humanitarian initiatives launched by the UAE in support of the Palestinian people. It highlights the UAE's steadfast commitment to its humanitarian principles, providing assistance to those in need and enhancing relief efforts in cooperation with its charitable and humanitarian organisations.

Larry Ellison takes world's No. 2 billionaire spot

Oracle's high-profile AI investment pays off

DUBAI
BY JAY HILOTIN
Senior Assistant Editor

Larry Ellison has achieved a historic milestone, overtaking Mark Zuckerberg to become the world's second-richest tech tycoon — and the second-richest person globally — the latest Bloomberg Billionaires Index shows.

As of July 16, 2025, Ellison's net worth stands at \$251.2 billion, powered by a stunning surge in Oracle Corp shares.

The exact net worth figures may fluctuate depend-

ing on stock price movements and reporting dates, according to Bloomberg and Forbes data.

The catalyst for his jump: Oracle's high-profile AI investments in Europe and a powerful earnings report that sent the company's stock price soaring nearly 90 per cent in just twelve weeks.

With this rally, Ellison — co-founder, chairman, and chief technology officer of Oracle — added \$59 billion to his fortune in 2025 alone, outpacing Zuckerberg's gain of \$43.4 billion over the same period.
