What's News

Business & Finance

- ◆ **Inflation was tame** in May, with consumer prices rising just 0.1% from the previous month, allaying fears of an outsize hit to indicators from tariffs. **A1**
- ◆ **U.S. government bonds** rallied after the release of the CPI report, while an early fillip to stocks faltered, leaving the S&P 500 and Nasdaq down 0.3% and 0.5%, respectively, at the close and the Dow little changed. **B10**
- ◆ **Sales of Nintendo's Switch** 2 gaming device exceeded 3.5 million units since its June 5 launch, a record for any of the company's consoles. **B1**
- ◆ **Musk said he expects** Tesla to launch its robotaxi service on June 22 in Austin, Texas, though the date could be put back for safety reasons. **B1**
- ◆ **Nvidia and Perplexity** are collaborating to offer what they call localized and sovereign artificial-intelligence models to users in Europe. **B1**
- ◆ **Disney and Universal** sued artificial-intelligence provider Midjourney, claiming it illegally made copies of the studios' copyrighted works. **B1**
- ◆ **Assura, the U.K. healthcare** property investor, agreed to an improved bid equivalent to \$2.29 billion from a consortium of private-equity firms KKR and Stonepeak. **B2**
- ◆ **Marelli, a supplier of** parts to automaker Stellantis, filed for bankruptcy protection, citing "macroeconomic headwinds" associated with tariffs. **B2**
- ◆ **Bojangles, the fast-food** chain that specializes in fried chicken and biscuits, is exploring a sale that could potentially realize more than \$1.5 billion. **B3**

World-Wide

- ◆ **The EPA proposed to** weaken air-pollution standards for mercury and eliminate dioxide rules on power plants, reversing Biden-era policies as part of a bigger effort to curtail the agency's role in regulating climate change. **A1**
- ◆ **Texas Gov. Greg Abbott** said he would deploy the National Guard across parts of the state as protests against Immigration and Customs Enforcement in Los Angeles spread across the country. **A4**
- ◆ **Employment growth in** industries heavily reliant on unauthorized workers slowed. **A5**
- ◆ **A judge blocked the** Trump administration from detaining Mahmoud Khalil via a seldom-used provision of immigration law, putting the former Columbia student a step closer to being able to stay in the U.S. **A3**
- ◆ **Health Secretary Robert F. Kennedy Jr.** named eight new members of a key immunization committee, including opponents of vaccines. **A2**
- ◆ **The board of the Fulbright** academic-exchange program resigned over what it called impermissible political interference from the Trump administration in its operations. **A3**
- ◆ **The U.S. is moving to** draw down its presence in parts of the Middle East to essential personnel, the State Department and Pentagon said, as tensions in the region rise. **A7**
- ◆ **Elon Musk publicly** retreated from some of his attacks on Trump after phone calls between the camps, including one with the president. **A3**
- ◆ **Polish Prime Minister Tusk's** government survived a confidence vote in Parliament. **A7**

Weinstein Convicted of Sex Assault in New York

STEVEN HIRSCH/POOL

MIXED VERDICT: Fallen producer Harvey Weinstein, seen with lawyer Diana Fabi Samson, was found guilty of one sexual-assault count but acquitted of another in New York on Wednesday in his retrial. He is serving a prison sentence in California. **A3**

EPA Seeks to Roll Back Rules On Pollution at Power Plants

By ERIC NILER

WASHINGTON—The Environmental Protection Agency proposed weakening air-pollution standards for mercury and eliminating carbon dioxide rules on power plants, reversing Biden-era policies as part of an overall effort to curtail the agency's role in regulating climate change.

The easing of the environmental regulations Wednesday is in line with executive orders issued by President Trump in April to expand coal mining, leasing and exports, and push for greater use of coal-fired power generation.

Since taking office in January, EPA administrator Lee Zeldin has pushed to reverse regulations on climate, air and water pollution to ease rules on U.S. industries and encourage fossil-fuel based energy production.

The proposed changes will likely face a legal challenge.

Environmental groups said Wednesday they would oppose the EPA changes during the 45-day public comment period, and public-health groups issued statements objecting to the plans. The agency will issue a final rule after reviewing those comments.

"We urge EPA to abandon any effort to roll back these critical safeguards," said Harold Wimmer, CEO and president of the American Lung Association. "The agency's

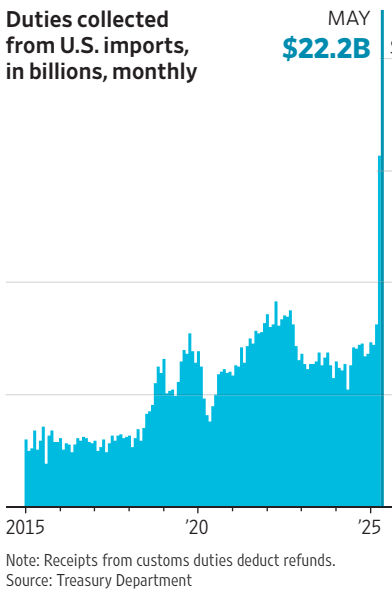

mission is to protect public health and the environment, not to expose people to more toxic pollution."

Mercury is a neurotoxin released by coal-burning power plants that accumulates in lakes and rivers, according to the EPA. The most common way people are exposed is by eating contaminated fish or shellfish. High levels of exposure can cause health problems such as a loss of peripheral vision.

Tariff Revenue Soars

Duties in April and May generated \$37.8 billion in revenue for the U.S. government, after new tariffs were imposed on steel, aluminum, cars and goods from China, Mexico and Canada. The duties made up 6% of the government's monthly income in May. **A2**

China's Lock on Rare Earths Dictated Path to Trade Deal

China's chokehold on supplies of minerals essential to high-tech goods from electric vehicles to jet fighters has become a formidable advantage

By *Lingling Wei, Jon Emont And Gavin Bade*

in trade talks with the U.S. China is putting a six-month limit on rare-earth export licenses for U.S. automakers and manufacturers,

according to people familiar with the matter, giving Beijing leverage if trade tensions flare again while adding to uncertainty for U.S. companies. Beijing's agreement to temporarily restore rare-earth licenses was one of the key breakthroughs in the latest round of intense trade talks in London, but the six-month limit illustrated how each side is retaining the tools to easily escalate tensions again.

In exchange for the Chinese

easing rare-earth curbs for now, the people said, U.S. negotiators agreed to relax some recent restrictions on the sale to China of products such as jet engines and related parts, as well as ethane, a byproduct of natural gas and oil drilling important in manufacturing plastics.

Details of the framework to uphold an interim agreement forged in Geneva last month are still being worked out, the

An Elderly Woman on a Pony Inspires Awe and a Little Concern

Jane Dotchin, 84, treks hundreds of miles every year; 'My sister thinks I'm an idiot'

By NATASHA DANGOOR

It's getting harder for Jane Dotchin to make her annual trip to Scotland. She's 84, needs two knee surgeries and is finding people don't have as much patience for an elderly traveler. She's also on a pony. For more than half a century, Dotchin has been trekking 600 miles from her home in Northern England to the Scottish Highlands and back. She has battled storms, reckless drivers and unforgiving terrain, subsisting on minimal food and the companionship of a dog she carries in her saddle bag.

On the home stretch of this year's journey, with Diamond the pony and Dinky the Jack Russell in tow, Dotchin is contemplating making it her last. The prospect is dividing family and friends, who have drawn both inspiration and exasperation from the aging pilgrim's trips.

"Some people say I'm

brave," she said during a stop on a trip she expected to complete in mid June. "My sister thinks I'm an idiot."

Dotchin's journeys have been a half-century odyssey of self-sufficiency and resilience, for herself and the ponies and dogs who have accompanied her.

The one-eyed former horse-riding teacher hasn't just navigated brutal weather, a hip replacement and a notorious bog in the Highlands. She also has charted a changing Britain, in which wildlife has thinned and drivers have become less accommodating to her trio.

This year, her 51st expedition, she had to turn back 100 miles shy of her usual endpoint. "The wind and rain have always been the biggest obstacle," Dotchin said, speaking from the road in Perthshire, Scotland. "But now it's my limbs."

History is full of tales of remarkable journeys undertaken

X's Sales Pitch: Give Us Your Ad Business or We'll Sue

Elon Musk and CEO Linda Yaccarino launched a campaign to strong-arm advertisers back onto the platform

Late last year, Verizon Communications got an unusual message from a media company that wanted its business: Spend your ad dollars with us or we'll see you in court. The threat came from X, the social-media platform that has been struggling to resuscitate its ad business after many corporate advertisers fled over concerns about loosened content-moderation standards following Elon Musk's \$44 billion purchase in late 2022.

By *Suzanne Vranica, Dana Mattioli and Jessica Toonkel*

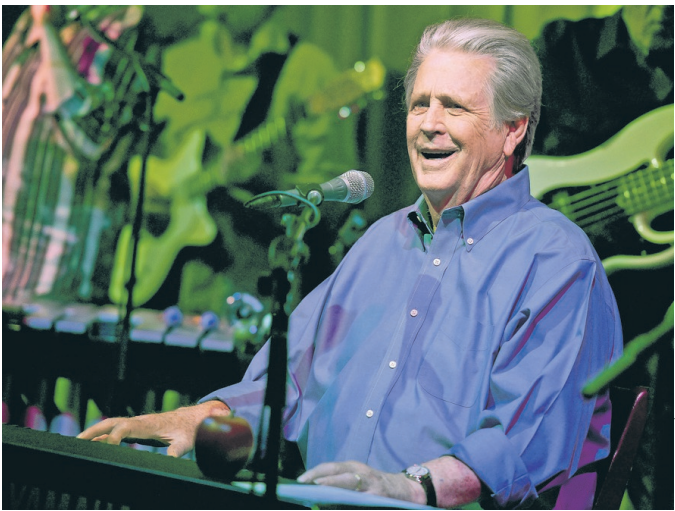

It worked. Verizon, which hadn't advertised on X since 2022, pledged to spend at least \$10 million this year on the platform, a person familiar with the matter said.

Fashion company Ralph Lauren also agreed

Beach Boys' Brian Wilson Dies at 82

ROCK VISIONARY: Brian Wilson, the pop music hitmaker and original leader of the Beach Boys, has died at age 82, his family said. The bard of 1960s surfer rock endured abuse and mental illness to become a pioneer of vocal harmonies in a career that produced many No. 1 songs and Grammy wins. **A6, A11.**
