A new Dubai Metro line spanning 42km and connecting 15 key areas in Dubai was announced yesterday.

In a post on X, His Highness Sheikh Mohammed Bin Rashid Al Maktoum, Vice-President and Prime Minister of the UAE and Ruler of Dubai, said the Dh34 billion Gold Line project will benefit 1.5 million residents.

The project will also strengthen connectivity to 55 major real estate developments currently under construction.

Once complete, the new line will increase the length of the Dubai Metro network by 35 per cent.

Scheduled to be completed on September 9, 2032, the landmark project will boost Dubai's position as the world's best city to live in.

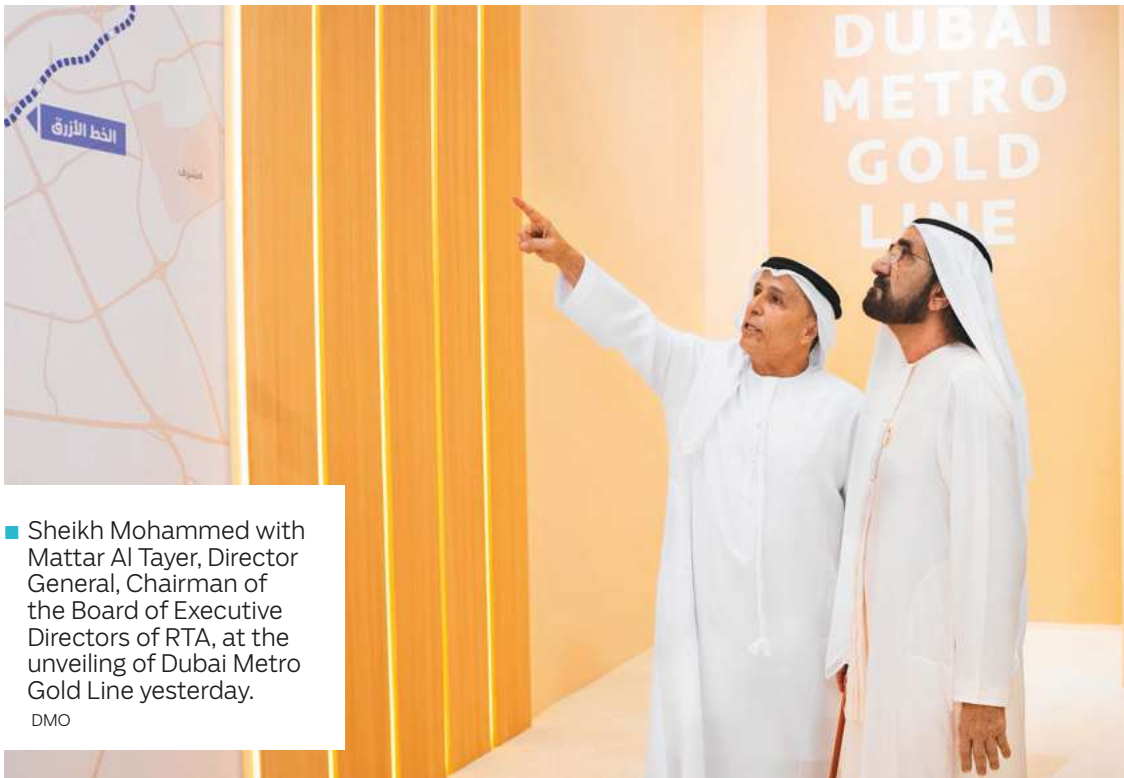

"Our future endeavours will not stop; rather, they will accelerate. Our plan is to build a better future for millions of people. We stand by our words and deliver on them," Sheikh Mohammed said.

Once complete, the new line will connect with existing Dubai Metro lines and even potentially the Etihad Rail.

The Dubai Metro Gold Line will be the first fully integrated underground route in the emirate, reaching a depth of 40 metres below the ground.

Advanced tunnel network

The project will feature an advanced tunnel network equivalent to twice the current Dubai Metro tunnels. It will feature construction work utilising the latest technology for

PRIMARY COMMUNITIES LIKELY TO BENEFIT

- Bur Dubai
- Al Ghubaiba
- Dubai Maritime City
- Port Rashid
- City Walk
- Jumeirah
- Satwa
- Zaa'beel
- Business Bay
- MBR City
- Al Merkadh
- Meydan
- Ras Al Khor
- Dubai Hills City
- Al Barsha South
- JVT & JVC
- Dubai Sports City
- Hadeq Mohammed Bin Rashid
- Nad Al Sheba
- Mohammed Bin Rashid Gardens
- Dubai Production City
- Dubai Studio City
- Tilal Al Ghaf
- Wadi Al Safa
- Al Barari
- Jumeirah Golf Estates
- Arabian Ranches

tunnelling without disrupting daily life, traffic, or existing developments.

The Gold Line will consist of 18 stations covering 15 key strategic areas across the city. The route will stretch from Dubai's historic centre at Al Ghubaiba in the north to Jumeirah Golf Estates.

The line will introduce loops and enhance the seamless mobility across short and long distances in key areas.

A core feature of the Gold Line is its integration with the wider Dubai Rail Network:

- Al Ghubaiba: An intersection with the existing Green Line.

■ Business Bay: An interchange with the existing Red Line.

■ Meydan: An interchange with the future Etihad Rail passenger station.

■ Jumeirah Golf Estates: An interchange with the Red Line and a future Etihad Rail passenger station.

BOOST FOR WORLD'S BEST CITY STATUS

42 km
is the length of the Dubai Metro Gold Line

Dh34 billion
will be the cost of the Gold Line project that will be fully underground

15 key areas the new line will connect

1.5 million
residents will benefit from the project

35% increase in length of Dubai Metro network on completion

55 major real estate developments will be connected

SEPT 9, 2032 IS THE SCHEDULED COMPLETION DATE

Iran hits three ships, seizes two

Trump extends ceasefire indefinitely as talks stall

DUBAI

BY STEPHEN N. R.
Senior Associate Editor

Iran escalated tensions in the Strait of Hormuz yesterday, firing on three ships and seizing two, even as the United States said it was indefinitely extending its ceasefire with Tehran amid stalled diplomacy.

US President Donald Trump said the ceasefire would continue without a fixed end date, but talks to resolve the conflict remain on hold. A second round of negotiations planned in Islamabad has been thrown into doubt after Iran rebuffed efforts to restart dialogue, prompting Washington to suspend Vice-President JD

Yesterday, Trump indicated that a second round of talks with Iran could take place within 36 to 72 hours, potentially in Islamabad.

Vance's planned visit to Pakistan. Yesterday, Trump indicated that a second round of talks with Iran could take place within 36 to 72 hours, potentially in Islamabad.

Tehran has insisted it will not return to the negotiating table unless the US lifts its naval blockade.

At sea, the situation continues to deteriorate. Iranian Revolutionary Guard forces attacked a third vessel, identified as *Euphoria*, while also seizing two previously targeted ships and escorting them

towards Iranian waters. Maritime monitors reported heavy damage to at least one vessel, though no crew casualties were confirmed.

Choking off traffic

The standoff has effectively choked off traffic through the Strait of Hormuz. Continued attacks risk deterring shipping further and tightening global energy flows.

Brent crude has surged above \$100 a barrel — up about 35 per cent from pre-war levels — while energy costs continue to ripple across global markets. European officials warn the disruption is costing hundreds of millions of euros daily.

With diplomacy stalled and maritime tensions rising, the crisis shows little sign of easing, raising the risk of prolonged disruption to global energy supplies.
