Border Patrol expands its reach

Critics question agency’s mission as it works far from usual terrain

BY **MARIANNE LEVINE**
AND **DEREK HAWKINS**

The Trump administration is increasingly relying on Border Patrol agents to help carry out the president’s mass deportation plan and arrest immigrants in cities far from the nation’s southern border — a departure from the agency’s traditional role that some lawyers and advocates consider alarming.

In the past month, Border Patrol agents have swarmed a Los Angeles park on foot and horseback; taken immigrants into custody at a New York City courthouse; raided a cannabis farm in California’s Ventura County; and detained day laborers at Home Depot parking lots as far north as Sacramento.

The Border Patrol has typically deployed most of its agents to the roughly 2,000-mile stretch of southwest border spanning Texas, New Mexico, Arizona and California. Their primary mission involves guarding borders between ports of entry, where they are tasked with intercepting drugs and weapons, preventing human trafficking, and stopping people from trying to enter the country illegally. Now as border crossings plummet to historic lows, Border Patrol agents are arresting immigrants hundreds of miles from the U.S.-Mexico border.

‘They tortured us’: Deportee recounts time inside CECOT

BY **TEO ARMUS,**
SAMANTHA SCHMIDT
AND **ARELIS R. HERNÁNDEZ**

Julio González Jr. had agreed to be deported to Venezuela. When the 36-year-old office cleaner and house painter boarded the flight in Texas in March, he assumed it would take him back to his home country.

Instead, the plane landed in El Salvador.

“The horror movie started there,” González said Tuesday.

Still shackled from the flight, González said, he and dozens of other migrants were shoved off the plane, pushed onto a bus, driven to a massive gray complex, and ordered to kneel there with their foreheads pressed against the ground as guards pointed guns directly at them.

Welcome to El Salvador, you sons of b-----s, a hooded figure told them. They had arrived at El Salvador’s Terrorism Confinement Center, known as CECOT. The United States has paid the Salvadoran government of President Nayib Bukele \$6 million to hold hundreds of migrants rounded up in President Donald Trump’s mass removals — many without ties to El Salvador, many without criminal charges — at the world’s largest prison.

With many Afghan men dead or disabled, women are key earners. But under the Taliban, they are often unable to find good jobs.

In Afghanistan, clandestine cuts and curls

Taliban’s salon ban has forced women to labor in the shadows — or struggle for other work

BY **RICK NOACK**

KABUL — For 22-year-old Simin, new clients come with the fear of arrest.

She instructs them to park several blocks from her house and to avoid the soldiers who patrol the area. Then, she said, the newcomers make their way to an unmarked door, announcing their arrival in hushed tones.

Inside, Simin runs a hair and beauty salon for women. It was a booming business until two years ago, when Taliban authorities issued a blanket ban on salons — accusing proprietors of “vices” that were “prohibited in Islam.”

“I’m worried that the Taliban will find

us, but I have no other choice than to keep running it,” Simin told The Washington Post in Kabul. “It’s our family’s only source of income.”

Simin never dreamed of running a salon, let alone a clandestine one. When she graduated from high school in 2020, she hoped to become a heart surgeon.

But when U.S. forces withdrew from Afghanistan the following year and the Taliban regained power, the new regime began enforcing the world’s most extreme form of gender segregation: banning female education beyond sixth grade, barring female public workers from government offices and dispatching morality police to ensure that women adhered to

draconian rules governing their dress and movements.

The country’s 12,000 beauty salons initially seemed exempt from the crackdown — among the only public spaces where women were still allowed to gather — and Simin seized the opportunity. Afghan brides, desperate for company and distraction, couldn’t get enough of pre-wedding makeovers, she said. Simin and her sister could feed the entire family on their earnings, she said, including their unemployed father and brother.

But the thriving industry soon attracted the government’s ire. In 2023, officials ordered women to shut down their salons.

For Tanner, ‘life was awesome’

The 30-year-old died of cancer on June 25. His family is learning to cope.

BY **ARIANA EUNJUNG CHA, JAH1 CHIKWENDIU, DREA CORNEJO AND DAN KEATING**

AMERICAN FORK, UTAH — Beneath the dusty green of the midsummer mountains, Shay Martin cradled her infant daughter — not quite two months old — and leaned in to kiss the smooth wood of her husband’s casket. A joyful constellation of Star Wars stickers — tiny stormtroopers, droids, Princess Leias — placed by family and friends covered the surface. Nearby, a harpist threaded together hymns with music from the film series’ beloved score.

Tanner Benjamin Martin was 30.

Five years ago, he was diagnosed with colon cancer — becoming one of a growing number of young adults nationwide caught in a quietly accelerating crisis reshaping what we know about the disease, its origins and how to confront it.

Tanner and Shay coped with the illness online, sharing emotionally raw updates with the world that spread fast and wide. They recorded the

OSZY OSBOURNE 1948-2025

Forger of heavy metal became the genre’s manic ringmaster

Success, excess marked career of Black Sabbath front man, solo star and rock standard bearer

BY **HARRISON SMITH**

Ozzy Osbourne, the howling singer, madcap showman and self-anointed “prince of darkness” who helped pioneer heavy metal’s thunderous, earsplitting sound as the front man for Black Sabbath, died July 22, just weeks after he reunited with his bandmates for a farewell concert in England, according to the Associated Press. He was 76.

“It is with more sadness than mere words can convey that we have to report that our beloved Ozzy Osbourne has passed away this morning,” his family said in a statement. “He was with his family and surrounded by love. We ask everyone to respect our family privacy at this time.”

A cause was not immediately released. Mr. Osbourne had been hospitalized several times in recent years, and announced in 2020 that he had Parkinson’s disease.

Playful and flamboyant, with an exuberant personality that belied the foreboding music he recorded with Black Sabbath in the 1970s, Mr. Osbourne was a dominant figure in hard rock for more than four decades, known as much for his manic performance style — he once bit the head off a bat, mistaking it for a toy — as his

distinctive nasal yawp.

In a career punctuated by struggles with drug and alcohol addiction, he established himself as a successful solo artist in the 1980s with songs like “Crazy Train” and “Flying High Again”; launched an annual heavy-metal festival, Ozzfest, in the ’90s; then returned to pop-culture prominence in the early 2000s with an Emmy-winning reality show, “The Osbournes,” that focused on his turbulent family life.
