Senate vote to end shutdown fails

Dems hold firm in bid to fund health subsidies; Trump promises ‘irreversible’ cuts in retaliation

By Lisa Mascaro, Mary Clare Jalonick and Stephen Groves Associated Press

WASHINGTON — A vote to swiftly end the government shutdown failed Wednesday, as Democrats in the Senate held firm to the

party’s demands to fund health care subsidies that President Donald Trump and Republicans refuse to provide. The tally showed cracks in the Democrats’ resolve on the first day of the shutdown but offered no breakthrough. Blame was being cast on all sides. The White House

and Congress failed to strike an agreement to keep programs and services open, throwing the country into a new cycle of uncertainty. Vice President JD Vance warned of firings of federal workers ahead. “Let’s be honest, if this thing drags on for another few days or, God forbid, another few weeks, we are going to have to lay people off,” Vance said in the White House briefing room. Roughly 750,000 federal

workers were expected to be furloughed, with some potentially fired by Trump’s Republican administration. Many offices will be shuttered, perhaps permanently, as the president vows to “do things that are irreversible” to punish Democrats. Trump’s deportation agenda is expected to run full speed ahead, while education, environmental and

ILLINOIS IMPACT: More than 153,000 federal workers in Illinois will be impacted — and 45,000 federal workers here could be furloughed, according to Gov. JB Pritzker, adding that benefit programs and the economy may be disrupted. **Chicagoland, Page 2**

Curbs sought on ICE arrests

Judge is asked to bar warrantless actions at court facilities

By Madeline Buckley Chicago Tribune

Cook County Public Defender Sharone Mitchell Jr. and a coalition of legal groups and social service organizations are petitioning Chief Judge Timothy Evans to enter a general order prohibiting warrantless immigration arrests in or around courthouses. Court facilities have historically been spared when it comes to immigration enforcement in order to create conditions in which defendants and witnesses are likely to show up for appearances. But sightings of federal immigration agents have increasingly been reported in and around area courthouses. In the petition, the attorneys wrote that court operations have been “significantly and negatively impacted by ICE’s enforcement,” citing a common law privilege against arrests within courthouses. During a news conference

Striving for safer sleep

Study reveals racial disparities in county’s sudden infant deaths

By Lisa Schencker Chicago Tribune

Black babies died suddenly and unexpectedly in their sleep at a rate 14 times higher than white babies in Cook County between 2019 and 2023 — a startling disparity revealed in a report released Wednesday by county and health officials. “I know what it is like to be a Black woman in America, so when I see data like that, it shakes me to my core,” said Dr. Olusimbo Ige, Chicago Department of Public Health commissioner, during a news conference. “Babies are dying simply because mothers don’t have the information and the support that they need.” In all, 208 infants in Cook County died suddenly and unexpectedly while sleeping between

At NU, dozens of students risk it all for ‘moral clarity’

Required training conflates criticism of Israeli government with antisemitism, they maintain

By Kate Armanini Chicago Tribune

Micol Bez has three weeks to make a choice. The Northwestern University graduate student has spent years studying political epistemology and abolitionism. Now, she is prepared to risk everything — her Ph.D. dissertation, her student status and her visa — in an act of protest she calls “a question of moral clarity.” Bez is part of a group of students boycotting Northwestern’s controversial antisemitism training video, which critics say

conflates criticism of Israel with antisemitism. Those who refuse to complete the online training will be unable to enroll in fall classes, the university said, which could jeopardize their academic standing if they miss the final course registration deadline. “I’m in a profound moral crisis,” said Bez, who is a member of the student group Northwestern Graduate Workers for Palestine. Her refusal to engage in the training, which makes it “impossible to structurally critique
