UAE-made cancer medicines to reduce costs for patients

Mubadala Bio's new facility makes essential oncology drugs accessible locally

DUBAI
BY JUSTIN VARGHESE
Your Money Editor

Cancer patients in the UAE are set to gain more reliable access to essential treatments following the opening of a new high-potency pharmaceutical manufacturing facility by Mubadala Bio and the launch of locally produced oncology medicines.

The facility, operated by Mubadala Bio's subsidiary Bio-venture Healthcare, enables complex cancer and hormone therapies to be manufactured within the UAE. Built to international safety and regulatory standards, it supports the local

Alongside the facility's opening, Mubadala Bio has introduced three essential oncology medicines to the local market.

production of medicines that patients have traditionally depended on imports to receive, reducing reliance on overseas supply chains.

Alongside the facility's opening, Mubadala Bio has introduced three essential oncology medicines to the local market. Some are being produced in the UAE for the first time as branded generic products, expanding treatment availability for patients with multiple myeloma and certain advanced or progressive cancers. The medicines are intended for use across hos-

pitals and specialist treatment centres nationwide.

Improving access

"The launch of the facility, along with the advanced oncology drugs aims to enhance national drug security, improve access and supply of highly needed therapies, and reduce costs," the company said.

"The launch of these locally produced oncology medications marks another important addition to Mubadala Bio's growing portfolio," said Dr Bakheet Al Katheeri, CEO of Mubadala's UAE Investments Platform and Chairman of Mubadala Bio.

"By investing in local capabilities and launching essential oncology medications, we are expanding access to additional medical therapies and ensuring consistent supply locally," said Dr Essam Mohamed, CEO of Mubadala Bio.

Wynn Al Marjan tower tops out at 283 metres

RAK's tallest structure to open in 2027

DUBAI
BY NIVETHA DAYANAND
Assistant Business Editor

Wynn Al Marjan Island marked a pivotal construction milestone on Monday, with the resort's 70-floor tower topping out at 283 metres of structural concrete height. Just 27 months after foundations began, the project stands ready for its spire installation next year, pushing the full height to 352 metres and making it Ras Al Khaimah's tallest structure by more than 100 metres.

The achievement signals the shift to full interior fit-outs across all 1,530 guest rooms and suites, with 1,504 already underway.

Spanning more than 60 hectares, the integrated resort will open in spring 2027 with 1,217 rooms, 297 Enclave suites, two Royal Apartments, four Garden Townhomes and 10 Marina Estates. Guests will find 22 restaurants and bars, a beach club, an opulent spa, a luxury shopping parterre, Coral Court events venue, The Showroom theatre, 12 pools and a 420-metre white-sand beach with a deep-water marina for superyachts.

UAE to ban more single-use plastic items next year

MINISTRY URGES ALL ESTABLISHMENTS, MARKETS, AND SUPPLIERS TO COMPLY

DUBAI

Gulf News Report

The Ministry of Climate Change and Environment (MOCCAE) has announced the commencement of the second phase of Ministerial Decision No. 380 of 2022, which prohibits the import, manufacture and trade of an expanded range of single-use consumer plastic products and bags. The measure takes effect on January 1, 2026.

This step is part of the broader framework of environmental legislation designed to safeguard the UAE's natural ecosystem and minimise the environmental impacts of waste, in line with the nation's strategic priorities to advance sustainability and enhance quality of life.

The Ministry has clarified that the ban covers a defined range of single-use items including beverage cups and lids; cutlery, such as spoons, forks, knives, and chopsticks; plates; straws; stirrers; and food containers and boxes made of styrofoam.

Comprehensive ban

The decision also establishes a comprehensive ban on single-use bags, regardless of their constituent material, including paper, if their thickness is less than 50 microns. This will take effect on the same date.

Eng Alya Abdelrahim Alhar-moodi, Assistant Under-Secretary for the Sustainable Communities Sector at the Ministry

50 microns
is the minimum
thickness allowed for
single-use bags

of Climate Change and Environment (MOCCAE), said that the implementation of this decision is a crucial step in the UAE's journey towards a more sustainable future. In line with its commitment to ensuring the smooth flow of trade and supporting the industrial sector, the Ministry noted that the decision includes specific exceptions.

These apply to products manufactured for export, whereby the production of prohibited items is permitted on the condition that they are clearly labelled for export or re-export outside the UAE and are not circulated within the domestic market.

Bags and products made from recycled materials within the UAE are also exempt, in order to support and stimulate the local recycling industry. Additional exemptions apply to medicine bags, refuse bags, very thin plastic bags used to wrap fresh food items such as meat, vegetables, and bread, as well as large shopping bags intended for clothing, electronics, and toys.

The Ministry urged all establishments, markets, and suppliers to comply fully with the provisions of the decision.
