MOHAMMAD PRESIDES OVER SWEARING-IN OF 35 JUDGES

His Highness Shaikh Mohammad Bin Rashid Al Maktoum, Vice-President and Prime Minister of the UAE and Ruler of Dubai, presided over the swearing-in ceremony of 35 new judges at Dubai Courts. The ceremony took place at Al Mudaif Majlis in Union House in Dubai. Shaikh Mohammad wished the new judges success in their roles, emphasising the importance of upholding justice and integrity.

UAE schools to integrate cybersecurity lessons

MOVE PART OF STRATEGY TO EMBED 21ST-CENTURY SKILLS

DUBAI
Gulf News Report

The Ministry of Education will integrate cybersecurity concepts into the national curriculum for students from Grade 1 through Grade 12 starting in the 2025–26 academic year, as part of a sweeping effort to equip young people with the skills to navigate an increasingly digital world safely.

The initiative introduces specialised teaching guides in English that address digital safety and cybersecurity, aiming to create a secure educational environment in step with the country's rapid technological transformation.

The initiative introduces specialised teaching guides in English that address digital safety and cybersecurity, aiming to create a secure educational environment in step with the country's rapid technological transformation.

Digitally resilient society

The materials offer both theoretical and practical foundations to help students use the internet and modern technology responsibly, aligning with the UAE's vision of building a digitally resilient society.

Content is tailored to each stage of schooling. In Grade 1, pupils learn the basics of staying safe online.

By Grades 2 and 3, they explore the idea of the "digital world" and what the internet is. Fourth graders take part in a STREAM project, which trains them in digital self-protection through interactive exercises.

In the middle years (Grades 5–8), lessons delve deeper into online safety, cybersecurity and protective measures, presented in ways that match students' growing capacity for critical thinking.

The aim, educators said, is to strengthen their ability to recognise safe behaviour and identify common digital risks.

High school students (Grades 9–12) will study networks and the internet before moving to more advanced topics. In Grade 12, a dedicated "Cybersecurity" guide will prepare them for further study or careers in related fields, raising their awareness of digital threats and their readiness to address them.

Core competency

The program is part of the ministry's strategy to embed 21st-century skills into the education system, with cybersecurity treated as a core competency in an era of accelerated digital transformation and widespread use of smart devices in classrooms.

Education experts welcomed the move, saying it would bolster students' resilience against online threats and prepare them to engage with technology safely and effectively. They also stressed the need for cooperation between schools and families to reinforce these concepts both in and out of the classroom.

Power banks cannot be used on Emirates flights from October 1

Passengers can carry one device in cabin subject to restrictions

100
Watt Hours is the limit for 1 permitted power bank

DUBAI
BY MANOJ NAIR
Business Editor

Power banks cannot be used on Emirates flights from October 1, the Dubai airline has confirmed.

"Emirates travellers are still permitted to carry one power bank onboard with specific conditions," the airline said in a statement.

"But the power banks may not be used while in the aircraft cabin — neither to charge devices from the power bank, nor to be charged themselves using the aircraft's power source."

- Passengers can carry one power bank that is under 100 Watt Hours.
- Power banks may not be used to charge any personal devices onboard.
- Charging a power bank using the aircraft's power supply is not permitted.
- All power banks accepted for transport must have capacity rating information available.
- Power banks may not be placed in the overhead stowage bin onboard the aircraft and must now be placed in the seat pocket or in a bag under the seat in front.
- Power banks are not permitted in checked luggage, which is very much the existing rule.

Reducing risks

"Emirates new regulations will significantly reduce risks associated with power banks by prohibiting their use while onboard the aircraft," said the airline. "Storing power banks in accessible locations within the cabin ensures that in the rare event of a fire, trained cabin crew can quickly respond and extinguish the fire."

The batteries contain lithium ions suspended in an electrolyte solution. The ions flow through the electrolyte, travelling back and forth between two electrodes as the battery charges and discharges. "If the battery is overcharged or damaged, it may result in 'thermal runaway'," according to Emirates. "This can result in dangerous consequences like fire, explosions, and the release of toxic gases."

Dubai joins global hotspots for second-home owners

Emirate among top-20 luxury hotspots

DUBAI
Gulf News Report

If you had $30 million or more, where would you buy your next home?

For a growing number of the world's ultra-wealthy, the answer is shifting away from traditional playgrounds like Monaco and Saint-Tropez.

A new wealth analysis by Altrata, reported by *Business Insider*, ranks the top 20 global cities where individuals with a net worth of at least $30 million are most likely to own second homes in 2025. While familiar names such as London and New York continue to dominate, emerging destinations — like Dubai — are rapidly gaining traction.

In the United States, the top destinations are Miami (13,211 ultra-wealthy second-home owners), New York (12,813), Los Angeles (8,640), San Francisco (6,477), and Naples, Florida (4,213). Globally, London leads outside the US with 9,221 owners, followed by Beijing (5,648), Hong Kong (4,939), Singapore (4,256), and Geneva (1,745).

Dubai ranks 11th, with 1,288 of the world's richest holding second homes in the emirate.
