US strikes Houthi targets after rebel missile hits Israel

NETANYAHU VOWS DECISIVE ACTION AGAINST YEMENI MILITANT GROUP

DUBAI
BY STEPHEN N. R.
Senior Associate Editor

The US launched air-strikes on targets in Yemen's Houthi-held capital, Sana'a, following a missile attack that wounded 16 people in Israel's commercial hub, Tel Aviv, a second such attack by militants on Israel in two days. Among the targets struck by US forces on Saturday were a missile storage centre and a command-and-control facility, the US Central Command (CENTCOM) confirmed. US forces also intercepted multiple Houthi drones and an anti-ship cruise missile over the Red Sea. American and British forces have repeatedly struck militant targets in Yemen this year in response to Houthi attacks on shipping in Red Sea area waters vital to global trade. In a separate incident yesterday, two US Navy pilots were shot down over the Red Sea in what the US military described

as an apparent "friendly fire" incident. The pilots, who ejected safely from their F/A-18 aircraft, were recovered alive, with one sustaining minor injuries. The aircraft had launched from the USS Harry S. Truman, a carrier that CENTCOM recently confirmed was operating in the Red Sea. These incidents underline just how dangerous the Red Sea corridor has become, with ongoing attacks on shipping by the Iranian-backed Houthis despite US and European military coalitions patrolling the area. Israel's warning Israeli Prime Minister Benjamin Netanyahu, meanwhile, issued a stern warning to the Houthis, pledging decisive action against the rebel group. "As we acted with force against the terrorist arms of Iran's axis of evil, so we will act against the Houthis... with force, determination, and sophistication," Netanyahu said in a video statement. **SEE ALSO P9**

New Dubai bridge cuts travel time from 15 to 3 minutes on key road

Ensures seamless traffic flow to Dubai International Airport

DUBAI
Gulf News Report

A new 1km bridge opened yesterday in Dubai, greatly easing traffic flow from Hessa Street to Al Khail Road. The Roads and Transport Authority (RTA) said the two-lane bridge has reduced travel time from Hessa Street to Al Khail

Road from 15 minutes to just three minutes. The bridge ensures a "seamless" traffic connection to Dubai's city centre and Dubai International Airport. RTA also announced that 54 per cent of the Dh689 million Hessa Street development project, which includes the upgrade of four major intersec-

tions, has been completed. All intersections are expected to be fully operational by the fourth quarter of 2025. Mattar Al Tayer, Director-General, Chairman of the Board of Executive Directors of the Roads and Transport Authority (RTA), said the Hessa Street development project, spanning 4.5km from its intersection with Shaikh Zayed Road to its intersection with Al Khail Road, represents a continuation of efforts to develop road infrastructure to keep pace with the emirate of Dubai's continuous growth.
